

1       IN THE SPECIFICATION

2               Enclosed with this amendment is a clean copy of a substitute specification labeled Exhibit  
3       “B,” submitted under 37 C.F.R. §1.121(b)(3) and §1.125(b) together with a marked up version of  
4       the substitute specification labeled Exhibit “A.” The Applicant requests that the English language  
5       translation of the specification filed May 4, 2006 be replaced with the enclosed substitute  
6       specification labeled Exhibit “B.” The Applicant believes that the substitute specification is fairly  
7       based on the original disclosure and includes no new matter. The amendments included in the  
8       substitute specification are formal in nature and made merely to place the case in a format more in  
9       keeping with U.S. practice and to address the objection to the title set out in the Office Action.
